

Lesson 1 and 2 Review

HOMEWORK

Name: _____

DATE: _____

Math: _____

Simplify using the distributive property

1. $-6(t - y)$

2. $7(5y - 12)$

3. $-5(-2u - 7)$

4. $5(w + 5)$

5. Explain how to use the distributive property to multiply $6(3r + 4s)$

Name each property:

6. $3(6 \cdot 2) = 3(2 \cdot 6)$

7. $8 = 8 + 0$

8. $4(8 \cdot 3) = (4 \cdot 8)3$

9. You have \$120 in your checking account. In one month, you deposit \$30, write a check for \$21, withdraw \$20, and deposit \$45. Find your balance at the end of the month.

Challenge:

10. $-2 - 3 + (-4) - 5 - (-6)$
